Headings, Highlights and Lists

- All the goodness, features and plugins of **revealjs**
- Everything you already **know** and **love**
- For instance...
 1. PDF Export ✨
 2. Rich ecosystem of plugins 🌟
 - like zoom, speaker notes, ...
 3. Transitions & Animations

React + Tailwind CSS 🚀

- All the customization power of **React** and **Tailwind**
- Create slides as React components
- Construct custom **slide templates**
- **Style** everything in a breeze with Tailwind CSS
 - Stylistic & Professional or **Playful**
- Easily use, adapt or build new features
 - **Did you already notice this cool footer?** 🙌

L^AT_EX Support

- Include **math expressions** in your slides
- Rendered with K^AT_EX (katex.org)
- Examples:
 - $S = \{e_1, e_2, e_3, \dots\}$
 - $\sum_{e \in S} e^i \neq 100 \forall i \in \mathbb{N}$

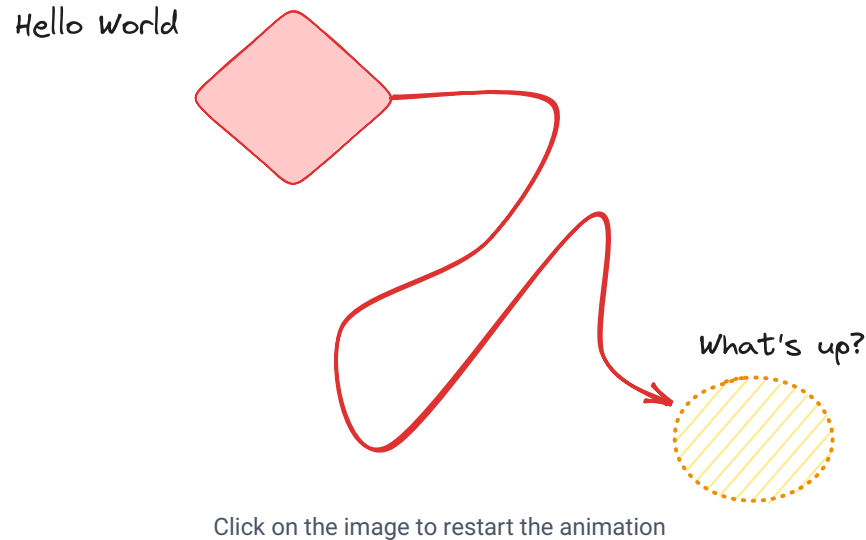

Interactive Slides

- Slides can be as interactive as you want
- Interactivity + Math = 
- **Click me**
 - You clicked the button 0 times already
 - $\sqrt{0} \approx 0$
 - Keep on clicking!

Animated SVGs

- Effortlessly **animate** SVGs with a draw effect
- Powered by **vivus.js** 
- Also works great with **excalidraw** sketches

Annotate Slides

- **Annotate** slides during your presentation
- Powered by [excalidraw](#)
- Simply press `Shift + d` to toggle annotations

- Annotations are (temporarily) saved per slide

Enough Room

for

Your Ideas

The End

You reached the end.

See you on the other side!
